

AA - IW840I

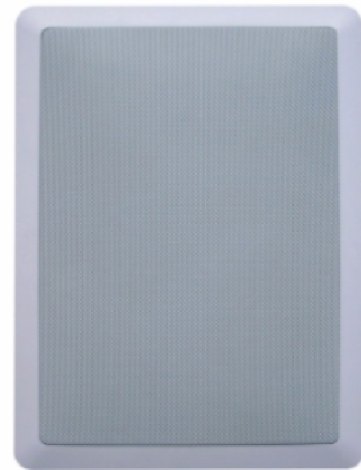

40W, 8" In wall high fidelity speaker

The Alpha Acoustics in-wall speakers are designed with a unique combination of aesthetics, acoustics and mechanical robustness. These speakers are designed to be heard and not seen ensuring excellent acoustic performance without creating any visual disturbance.

The AA-IW840I speakers are perfectly suitable for indoor applications where aesthetics play a major role.

The entire portfolio of Alpha Acoustics is manufactured to meet the most stringent global standards and is designed for continuous operation.

These in-wall speakers are designed for high quality music reproduction and the Alpha Acoustics engineering team has ensured that all components are of the highest quality and provide great reliability.

These in-wall speakers can be used in corridors, meeting rooms, ball rooms museums, club houses and other areas where the speakers should be unobtrusive.

With a frequency response of 90Hz - 20 KHz these speakers ensure that there is no compromise when it comes to speech and music reproduction. The 8" driver ensures that the speaker delivers sufficient lows to produce a great ambiance. The 100V/70V built in transformer also enables easy connectivity for public address & voice alarm applications.

FEATURES

- In wall speaker
- Pleasing aesthetics and unique design language
- Suitable for high quality background music and speech reproduction
- Excellent frequency response
- Built in 100V/70V transformer

SPECIFICATIONS

LF Driver	8"
HF Driver	1"
Power @100V	40 W
Power @70v	20 W
SPL (1W/1m)	88 dB
Max SPL @ 1m	104 dB
Frequency response	90Hz - 20 kHz
Hole cut out size	325 X 220 mm
Dispersion Angle	90° x 60°
Product dimensions	360 X 256 X 100 mm
Enclosure material	ABS
Weight	2.7 Kg
Colour	White
